

AMENDMENTS TO THE DRAWINGS:

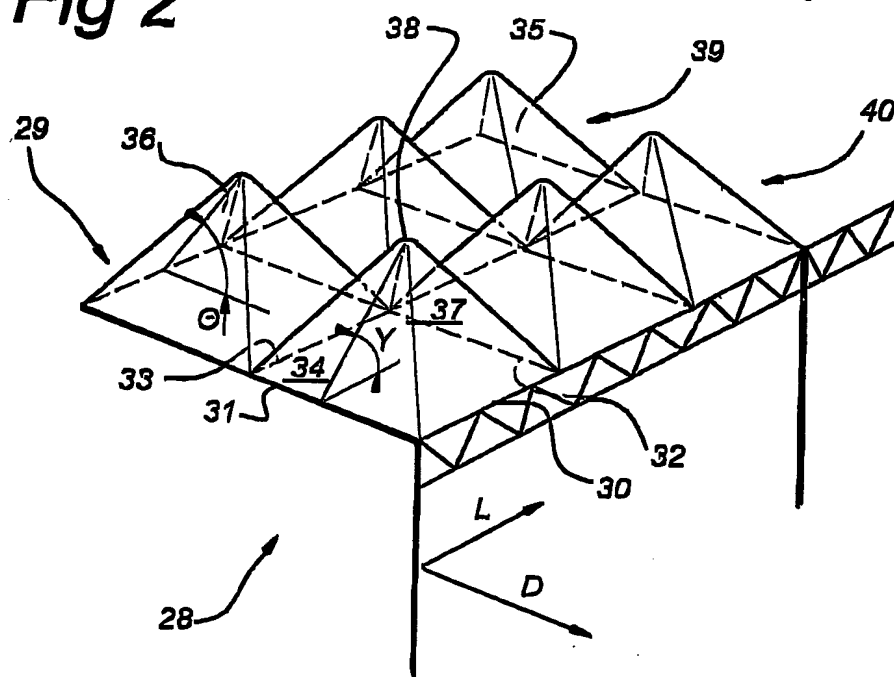

Two replacement drawing pages accompany this response. The first drawing page includes Figures 1 and 2. In this drawing, Figure 2 has been corrected to bring the definitions of  $\theta$  and  $\gamma$  into correspondence with the definitions shown in Figure 1. Figure 1 has not been amended. In the second drawing sheet, Figure 3 has been turned right-side-up (it was upside down in the original drawing). Further, the identification of angle  $\theta$  has been amended to  $\theta'$  because it is not the same angle shown in Figures 1 and 2.
